

# Online Listening Quiz

The online listening quiz was given as an online test to the Semester II students as a requirement of the English Language Skills Enhancement II course module. This task was uploaded to the Learning Management System and the students were asked to complete the test online within the given time period by following the instructions given. There were 10 questions to be answered and the questions included multiple choice answers and short answer questions. The students were instructed to watch the video while listening to it and two attempts were given to play the video and the time allocated was indicated on the top right corner of the window and at the end of the test the students can see the number of correct and wrong answers and by the grading system the total marks obtained, and the grade obtained was displayed. Almost all the students have attempted the online listening quiz and most of them have got accurate answers.

The main objective of this online listening quiz was to make the students aware of the online quizzes and give them a practice of doing tests online. I believe that my attempt of giving the students an exposure of online tests was successful as most of the students have taken part in the test and they have scored well as well. This test required technological skills, listening skills, comprehension skills, writing skills and time management skills as well.

The screenshot shows the ITUM LMS interface for the course IS1203 - English Language Skills Enhancement II - 20S2. The main content area features a video player with a play button and a red question mark, depicting a pressure cooker on a stove. To the left of the video, a sidebar indicates 'Question 1' is 'Not yet answered' and is worth '1.00' mark. It also includes options to 'Flag question' and 'Edit question'. To the right, a 'Quiz navigation' panel shows five question buttons (1-5), a 'Finish attempt...' link, a 'Time left 0:04:49' timer, and a 'Start a new preview' button. Below the video, the question text reads: '01. What has made the pressure cooker an efficient kitchen appliance?' followed by an 'Answer:' label and a text input field.
